

In today's global economy it is not always possible to have your own quality control inspector onsite. IDFL has extensive experience in collecting samples, auditing, and inspecting factories to help you receive high quality products.

IDFL's three locations allow convenient global access for the following services:

- **Sample Collection** – Random sample collection to verify that bulk materials or finished products are meeting specifications and labeling standards
- **Finished Product Inspection** – On-site factory inspection of finished products according to buyer specifications
- **Sterilization Inspection** – Authorized to conduct sterilization inspections for the USA
- **Quality Control** – Thorough audit of factory quality control procedures and ideas for improvement of manufacturing processes
- **Supply Chain** – Identify origin of materials, and assess risk based upon customer's set criteria
- **Consulting** – Evaluate specifications, testing protocols, and quality control procedures that will ensure quality products

Testing, Inspection, Consulting and Research Excellence
